Charles Nelson, MD

Craig Israelite, MD

T. David Tarity, MD.

Christopher Anthony, MD

Neil Sheth, MD

Christopher Travers, MD

Emmanuel Gibon, MD, PhD

Timothy Costales, MD

This past academic year has been one of productivity and growth for the Penn Orthopaedics Adult Reconstruction Division. Despite the continued challenges with the ongoing COVID pandemic, the adult reconstruction division has maintained a high surgical volume and provided high quality care for a wide spectrum of patients. We continue to care for both healthy and high-risk patients with innovative strategies to minimize complications and optimize quality in the high-risk patient cohort. Additionally, we have grown our department with the addition of Emmanuel Gibon, MD, PhD, and Timothy Costales, MD. In addition to clinical excellence, our faculty have remained active in making scientific contributions and clinical education nationally and internationally, as well as serving in leadership and volunteer positions within prestigious national orthopaedic organizations including:

the American Academy of Orthopaedic Surgeons; The Hip Society, The Knee Society, the International Hip Society, the American Association of Hip and Knee Surgeons, the American Orthopaedic Association, and the American Board of Orthopaedic Surgeons. Our faculty participated in several dozen peer reviewed publications, scientific presentations and invited lectures in 2022-2023. The division maintains active in clinical research with significant federal and industry funding. The adult Reconstruction faculty members currently include Professor Charles L. Nelson, MD, Associate Professors Eric Hume, MD, Craig Israelite, MD and Neil Sheth, MD and Assistant Professors Christopher Travers, MD, Christopher Anthony, MD, T. David Tarity, MD, Emmanuel Gibon, MD PhD, and Timothy Costales, MD.
