## REAL LIFE TESTED

# DePuy Orthopaedics Hip replacements.

A heritage of over **40 years**.

As an avid cyclist, riding in charity events has become one of John's greatest passions. When joint disease threatened to take that away from him, he turned to surgery for help. His orthopaedic surgeon recommended a PINNACLE® Hip from DePuy Orthopaedics. In fact, a recent multi-center clinical study conducted by leading orthopaedic surgeons showed that eight years after surgery, 96.1% of patients still depend on their PINNACLE Hip replacements in their daily lives. John has tested his PINNACLE Hips for 8 years and is gearing up for a 7-day charity bike ride. He'll tell you, he feels like a new man.

**Important Safety Information** Hip replacement is not for everyone. There are potential risks. Recovery takes time and success depends on factors like age, weight, and activity level. Only an orthopaedic surgeon can tell if hip replacement is right for you.
